## ABOUT ME

I'm a Flutter Developer focused on building high-quality, cross-platform apps with clean UI/UX and maintainable Dart code. I work with Firebase, REST APIs, and enjoy solving real-world problems with scalable, user-friendly mobile solutions.

## EDUCATION

BCA , Atmiya University, 2020-2023

CGPA 8.20

MCA , Atmiya University, 2024-2026

SGPA 8.30

## WORK EXPERIENCE

BrainyBeam Technologies , Ahemdabad

ML intern

Explored core ML concepts including supervised/unsupervised learning, model training, and evaluation. Gained hands-on experience with Python, NumPy, pandas, scikit-learn, and basic ML algorithms like Linear Regression and KNN.

## PROJECTS

### Hackathon Buddy

Built a cross-platform Flutter app to help users find hackathon teammates using a Tinder-style swipe UI. Features include real-time chat, follow/unfollow system, search & filter options, and posting functionality. Integrated Firebase for backend services and DiceBear API for dynamic profile avatars.

### AI-Powered Quiz Generator App

Developed a Flutter app that generates quizzes (MCQs, True/False, Fill-in-the-Blanks) using the Gemini API. Users can upload PDFs, and the app extracts content to auto-generate structured quiz questions. Ideal for competitive exam prep and academic testing.

## ACHIEVEMENTS

### 1st Runner-Up – Mission Blackout Cyber Treasure Hunt

Secured 2nd place in a CTF-style cybersecurity competition focused on problem-solving, digital forensics, and ethical hacking challenges.

## SKILLS

- Flutter , Dart , C++ , Java , JS , TS
- Firebase, REST API, Node.js
